

24 June 2020

Greetings in the name of Jesus!

People have asked what I have been doing? Well for the last 4 weeks it has been building and getting ready for when the lockdown is over. In our county, we have had only 1 person with the virus. As a country, we are up to about 3,000 now.

As you recall, the Navillus Church of Christ building had to be taken down because of the flooding. We have began building on a $\frac{1}{4}$ acre plot, safe from the floods. At one time, we had five projects going on, which have kept Joseph Muhoro and myself on our toes keeping all the fundis (craftsmen) happy with materials. One day we had; a man cutting trees for timber, the 3 young men making concrete slabs, Mr. Kibet from the Ministry of Energy making a stove for the Navillus feeding program, Hudson and Yusuf putting in the slabs in the caretakers house and the carpenter building everything.

The truck has been SO useful, carrying everything to the site. And in our spare time, carrying murrium (subsoil) to the space that the new church construction will take place on Thursday of this week.

Blessings to each of you,

Keith and Grace

Three of our orphans trained to make the 2 foot x 2 foot concrete slabs. They are being paid for each to help them with their schooling when schools open again. And in the meantime, learning a trade.

Hudson is a trained mason and one of our youth at the Sergoit church. He trained the three in the previous picture. Here he and Yusuf, the person in charge of the Sunday School program at the Navillus Church, are putting slabs in the care takers house.

Guest house on the left. Middle is the care takers house and, on the right, a small kitchen area

The main kitchen area. Presently putting in the flooring and sink and cutting area. Soon will install four energy saving stoves

Toilet and shower for the plot

The place for the church building. It will be 23 feet x 39 feet in size

Two energy saving stoves installed at the Navillus Orphan Feeding Program
